CONTENT

The international environment of a firm is in continuous evolution. Understanding what the consequences of these changes are and how a firm can adapt or exploit them is crucial.

In this major, several specialists from the private sector (CEO/senior experts of banks), financial institutions (Directors/senior experts of Central Banks), and internationally recognized professors will teach to students (i) some of the state of the art techniques used in international finance, (ii) the most important changes in the international environment of the firm and (iii) how to deal with these changes. The major is a balanced mix between theory and application (with more focus on applications). Students will have the possibility to participate to innovative initiatives (at a Belgian level) such as short visits to international institutions and trainings given by international experts. The students also will be able to master the most important data provider and tool used in finance, i.e. Bloomberg.

5 MANDATORY COURSES
