Louvain

## Doctoral course in Economics

**2021 - 2022**

Semester 1 :  September  October  November  December

Semester 2 :  January  February  March  April  May  June

<b>Title</b>	Advanced courses in Economics IV
<b>Code course</b>	LECON2704
<b>Professor</b>	Amma Panin
<b>E-mail</b>	amma.panin@uclouvain.be
<b>Agenda</b>	Tuesday – 14:00 – week 7 to 10 Wednesday – 16:15 - week 7 to 10
<b>Abstract</b>	Experimental Economics  Experiments are increasingly ubiquitous in economics — in the lab, in the field, on the internet, in government. This seminar will focus on the design of experiments and the interpretation of the data that they produce. The discussions will pay particular attention to the role experiments play in advancing theory, and the econometric decisions researchers make when designing their own data generating processes (e.g. power calculations, correcting for multiply hypotheses etc.)

NOTE : if you plan to follow this course, please follow the next steps :

1. Ask the authorization of your thesis director to add this course in your doctoral program
2. Send an e-mail to [solange.dujardin@uclouvain.be](mailto:solange.dujardin@uclouvain.be) and [geraldine.carette@uclouvain.be](mailto:geraldine.carette@uclouvain.be) to confirm your registration with your Name, the Code of your Program (ECGE3FD or other) and the Code of the Course
3. Put your thesis director and the professor in CC of this e-mail
4. Specify also if you plan to pass the exam or not
