

Doctoral course in Economics

2021 - 2022

Semester 1 : September October November December

Semester 2 : January February March April May June

Title	GENDER and MIGRANT labour inequalities
Code course	LECON2701
Professor	Vincent Vandenberghe
E-mail	vincent.vandenberghe@uclouvain.be
Agenda	Wednesday – 10:45 – week 8 to 14
Abstract	<p>This seminar is destined for students with an interest in applied labour economics and a taste/competency for data analysis. It aims at showing students how they can gain insight and understanding of the different facets of wage discrimination and related labour inequalities, and also how these can relatively easily be quantified and analysed using different sorts of data. To this aim, the course will equip students with the theoretical background as well as the econometric tools enabling them to carry out state-of-the-art research, exploiting the growing availability of <i>i)</i> firm-level microdata, with detailed information about the composition of the labour force, labour compensation and productivity, but also <i>ii)</i> life-course data informing on respondents' entire job history, the arduousness of their successive jobs, the number of gaps between jobs or the number of times they have been made redundant.</p> <p>We will focus on GENDER and MIGRANT labour-market outcome inequalities.</p> <p>Participants are expected to be familiar with the use a statistical package (Stata, SAS, R).</p>

NOTE : if you plan to follow this course, please follow the next steps :

1. Ask the authorization of your thesis director to add this course in your doctoral program
2. Send an e-mail to solange.dujardin@uclouvain.be and geraldine.carette@uclouvain.be to confirm your registration with your Name, the Code of your Program (ECGE3FD or other) and the Code of the Course
3. Put your thesis director and the professor in CC of this e-mail
4. Specify also if you plan to pass the exam or not
