

Courses for the PHd school Public Health – Health and Society

This is a short list of courses that may help phd-students in getting skills and knowledge to achieve their PhD in public health. These courses are provided by the different partners of the PhD-School SPSS (UCL, ULB, ULg, FUNDP, ISP). This list is not exhaustive and includes only courses that fulfil the following criteria : the course targets or is useful for PhD-students in public health, it is recurrent (yearly) course, and the lecturer has accepted to make the course part of the PhD-school programme.

The list is divided in five topics : (1) Data collection and design (2)quantitative methods and computing, (3)qualitative methods, (4)communication and literature review, (5)topical courses.
